PROFESSIONAL SUMMARY

Software Engineering graduate with hands-on professional experience in web development and technical product support. Experienced with Next.js, Node.js, Laravel, JavaScript, SQL and modern web technologies, with a strong interest in Product Management and Product Analytics. Comfortable translating requirements into functional products, troubleshooting technical issues, collaborating with others and thinking from the user's perspective. Seeking an Associate Product Manager, Product Analyst, Product Operations or technology-focused Business Analyst role.

PROFESSIONAL EXPERIENCE

Maxxi Dev | Software Developer

Malaysia | August 2024 – June 2025

- Developed and maintained responsive web applications for clients using Next.js, Node.js, Express.js and Laravel.
- Translated project requirements into functional web features and user interfaces across frontend and backend systems.
- Collaborated with team members to understand requirements, identify issues and deliver solutions aligned with project objectives.
- Worked with databases and APIs to support application functionality and data-driven features.
- Investigated bugs and technical issues and implemented improvements to enhance application reliability and user experience.
- Gained practical experience balancing user requirements, business needs and technical feasibility when developing digital products.

FootfallCam | Technical / Software Intern

Malaysia | October 2023 – December 2023

- Supported deployment, configuration and performance tuning of people-counting camera systems used for customer analytics.
- Investigated technical issues remotely using VPN, GlobalProtect, Remote Desktop and PuTTY.
- Tuned and tested camera devices to improve detection and people-counting performance.
- Assisted with AI-based face-detection annotation and reviewed system outputs to identify potential accuracy issues.
- Investigated system behaviour and communicated technical findings to support troubleshooting and product improvement.

SELECTED PRODUCT & TECHNICAL PROJECTS

IgnitionIQ | Automotive Learning & Gamification Platform

| 2026

- Designed and developed a gamified automotive learning platform focused on making automotive knowledge more interactive and engaging.
- Defined product experiences including Car Recognition, Traffic Rules and Driving Situations, with scoring, levels, hints and leaderboards.
- Considered user engagement, progression and feature prioritisation when shaping the product experience.
- Translated product requirements and user flows into a functional web application using Next.js, Node.js, Express.js and Tailwind CSS.

WISE | Personal Financial Management Research Project

| 2025

- Researched a budget-planning product designed to support effective personal financial management.

- Investigated user needs and defined potential product requirements, workflows and user roles for students, financial advisers and administrators.
- Evaluated potential features based on user needs and project objectives using structured problem-solving and user-focused thinking.

EDUCATION

University of Hertfordshire | BSc (Hons) Software Engineering

United Kingdom | 2025-2026

- CGPA: 3.6/4.0
- Relevant areas: Software Engineering, Web Application Development, Database Systems, Software Design and Development, Programming

Asia Pacific University of Technology & Innovation | Information Technology / Software Engineering

Malaysia | 2022-2025

- CGPA: 3.6/4.0

PRODUCT & TECHNICAL SKILLS

Product: Problem Definition, Requirements Gathering, User Research, User Stories, User Journey Mapping, Feature Prioritisation, Competitor Analysis, Product Thinking

Technical: JavaScript, Python, Java, PHP, HTML/CSS, SQL/MySQL, Next.js, Node.js/Express.js, Laravel, Vue.js, Flutter, Firebase, Git/GitHub

Other: Technical Troubleshooting, API Integration, Database Development, AI Annotation, Remote Support

Languages: English, Mandarin, Malay
